

Blue Prism® Foundation

Course Data Sheet

Blue Prism Foundation Training provides a comprehensive introduction to all the concepts and activities associated with creating a Blue Prism process solution, with instructions and demonstrations before building your own process. After completing this course, you'll have acquired all the practical skills and knowledge required to build an end-to-end Blue Prism solution. The course concludes with a consolidation exercise where you can demonstrate the skills you have learnt.

Objectives

At the end of this course, you will be able to:

- Describe the key features and functionality of the Blue Prism application
- Describe the purpose and function of all the key components of a Blue Prism process
- Configure an end-to-end Blue Prism process
- Perform testing on a Blue Prism process
- Manage a Blue Prism process
- Publish a Blue Prism process

Modules

This course contains the following modules:

- Introduction to Blue Prism
- Process Studio
- Process Flow
- Inputs & Outputs
- Business Objects
- Object Studio
- Exception Handling & Exception management
- Case Management
- Additional Features
- Consolidation Exercise

Course details
